EDUCATION

Computational Biology and Bioinformatics Master

ETH Zürich

September 2019 - Today Zürich (CH)

I developed my Computer Science skills and got introduced to the field of Artificial Intelligence while deepening my knowledge in Quantitative Biology.

Life Sciences Engineering Bachelor

EPF Lausanne

September 2016 – July 2019 Lausanne (CH)

I acquired strong engineering and analytical skills. I made my way through calculus, I had my first encounter with object-oriented programming and I took active part in Life Sciences oriented laboratory experiments.

Electrical Engineering (exchange year program)

Lund University - Faculty of Engineering (LTH)

August 2018 – June 2019 Lund (SE)

I had the chance to discover a new country, improve my English skills and grow my social network. I took part in a wide range of lectures to complete my Bachelor, from Signal processing to Biomechanics.

PROJECTS

Evaluation of computational pipelines for multimodal single-cell data

Robinson Lab - UZH

May 2021 - Today Zürich (CH)

I investigated the performance of various normalization and clustering methods on CITE and REAP-seq data. I developed my own method to score the normalization based on its aptitude to differentiate signal from negative (isotype) and positive control ADTs. I improved my knowledge of R and the SingleCellExperiment package.

Surrogate data generation using Deep Knockoffs for nonparametric testing of fMRI time courses

MIP:Lab CIBM - EPF Lausanne

February - April 2021 Lausanne/Geneva (CH)

I investigated the novel application of Knockoff filter for fMRI data analysis under the supervision of Ph.D. M. G. Preti. I got my first experience of working in a research group and I improve my knowledge of Python.

VOLUNTEERING

CCBB President

VIS - ETH Zürich

Februar 2021 - Today Zürich (CH)

As a committee, we organised social and career events to improve the life of students and help them benefit from the experience of others. Personally, I learned to lead and manage a small group of people, communicate with them as well as with other committees. I gained in organisational and budgeting skills.

LANGUAGES

French ●●●●●

English ●●●●○

German ●●○○○

TECHNICAL (IT) SKILLS

Languages
C++, Python, R, Matlab

Tools
PyCharm, Jupyter, RStudio, GitHub

Document preparation
LaTeX, Microsof Office Suite

SOFT SKILLS

Problem solving | Hard-working | Eye for detail | Dynamic | Initiative taker | Punctual | Respectful | Team worker | Open to discussion

ACHIEVEMENTS

Being elected as committee president
I was accepted as the student association committee president of my Master (2021)

Being selected to study abroad
I was given the opportunity to take part in an exchange program based on my grades and motivation (2018)

Receiving a decoration from the army
I was awarded the Military Sport 1 decoration by the Swiss army during recruitment (2015)

Shooting a documentary
A fellow student and myself presented our movie at the "Visions du Réel" festival in Nyon (2015)

Performing in a painting show
I organised a painting show first alone (2013) and then leading three painters (2014) at the "Caribana" music festival
